ERD Explanation:

A groombooking holds all the information for a certain booking, firstly it has a one to many relationships with Groomservice i.e one booking can have multiple services. It also has one to one relationships with a pet and a groomer. It also has date, time and price columns. The price is calculated from the relationship with Groomservice. Groomservice has a name, cost and duration columns. The cost of a booking is obtained from the costs of the services in that booking. Groomers have a first name, last name, date of birth, phone number and an hourly rate. Owners have a one to many relationships with pets, so one owner can have many pets. They also have first name,last name,address,work number and home number fields. Species have one to many relationship to pets, and a name column. Pets have their name, weight, color, special notes and reference their owners.
